

Distress Factor Array for Most Recent Three-Year Period (in alpha order by locality)
Updated June 2007

Per the Enterprise Zone Statute, 50 percent of the scoring of an Enterprise Zone designation application is based on an applicant's ranking of three locality-wide distress factors: 1) the **average unemployment rate** for the locality over the most recent three-year period (2004 - 2006); 2) the **average median adjusted gross income** for the locality over the most recent three-year period (2001-2003); and 3) the average percentage of **public school** students within the locality receiving **free or reduced price lunches** over the most recent three-year period (SY '05, SY '06, SY '07). The application will have a total of 796 points, of which 398 will be determined on the basis of the locality-wide distress criteria and 398 will be based on answers to questions relating to local incentives, impact and capacity. Below are the rankings for each locality in Virginia for the three distress criteria. The column entitle "Distress Criteria Score" shows the sum these rankings and the number of points out of 398 that a locality will have based on their distress.. The greater the distress as reflected by the three criteria, the higher the score.

Distress Criteria Score (out of 398)	Area Name	Adjusted Gross Income, All	Ranking*	Unemployment Rate	Ranking**	Free and Reduced	Ranking**
259	Accomack County	\$34,534	122	4.3	22	61.2%	115
37	Albemarle County	\$66,108	16	2.4	3	20.4%	18
